Profiles   ⊙ musaibzahoor   🔗 Musaib Zahoor

Summary   Aspiring Engineer with a strong foundation in web development, cloud-native tools, and agile methodologies. Passionate about building scalable applications and enhancing user experience through modern technologies. Recognized for quick learning, proactive collaboration, and dedication to delivering quality solutions.

Experience

InterGlobe Aviation LTD   02/07/2024 - 02/08/2025
Officer- (Catering Systems & Digital Operations)   Srinagar,Airport
🔗 https://www.interglobe.com/aviation/indigo

- Worked in the catering and digital operations section, monitoring and maintaining software systems used for tracking food stock, meal trays, and beverage distribution for flights. Coordinated with catering, logistics, and IT teams to ensure smooth data synchronization between ground and in-flight operations. Gained hands-on experience in inventory management tools, food safety compliance, and digital reporting. Responsible for conducting system checks, verifying catering data accuracy, and supporting the technical documentation process for daily dispatches and audits.

My wishfin marketplaces ltd   September-2023 - May-2024
ARO   srinagar
🔗 https://www.wishfin.com/

I started working at a reputable financial company where I gained valuable knowledge in finance, sales, marketing, leadership, communication, and team management. Additionally, I also handled IT responsibilities due to my understanding of computer processes, allowing me to operate effectively in both scenarios.

Education

Pune Vidhyarthi Griha's College of Engineering and Technology and G K Pate(Wani) Institute of Management,   2019-2023
Computer Science And Engineering   Bachelor's Of Engineering (BE)
7.85 first class distinction

Projects

Zomapp

Developed a responsive and user-friendly food cart application called ZomaApp using React. The app allows users to browse a menu, add items to their cart, and place orders. It features a dynamic and interactive interface with real-time updates to the cart and order summary.

Weather App

Developed a command-line Weather App using Node.js that retrieves real-time weather data for any city worldwide. The app interacts with a third-party weather API to fetch and display current weather conditions, temperature, humidity, and wind speed.

LoginApp

Developed a secure and responsive login application using React that allows users to authenticate themselves by entering their credentials (email and password)

AI CHATBOT DEVELOPMENT

I have built an AI chatbot using Python, leveraging reflection and parallels to enhance its conversational capabilities.

FAKE NEWS DETECTION USING ML

I have developed an algorithm within the domain of machine learning that determines the authenticity of news articles, distinguishing between true and fake news.

Skills   React, Express js , MongoDb , Node , Angular ,Bootstrap , javascript, html, CSS
